

Customer: What makes Shokz sports headphones special for sports use?

Customer Service: Shokz sports headphones feature bone-conduction technology. They rest on your cheekbones and transmit sound through the bones in your head, leaving your ears open. This allows you to stay aware of your surroundings during outdoor activities like running. They are lightweight and designed with a secure fit to prevent them from falling off during workouts.

Customer: How's the battery life?

Customer Service: The headphones last up to 10 hours on a single charge, suitable for extended workout sessions or long-distance runs.

Customer: What about the sound quality? Since it's bone-conduction, is it as good as traditional headphones?

Customer Service: The sound technology is optimized for clear audio with decent bass. Additionally, the open-ear design creates a unique spatial audio experience.

Customer: Do they come with any additional accessories?

Customer Service: Each pair comes with a USB-C charging cable and a soft carrying pouch for protection during transport.

Customer: Are they water-resistant?

Customer Service: Yes. The headphones have an IP67 rating, making them highly water-resistant and able to withstand heavy sweat and brief submersion in water.

Customer: What's the price of these headphones?

Customer Service: The regular price is \$129, but they are currently on promotion for \$99.

Customer: How soon can I get them if I order now?

Customer Service: Orders placed within the next hour ship the same day. Standard shipping takes 4–6 business days, while expedited shipping takes 2–3 business days for an additional fee.

Customer: Can I return them if I'm not satisfied?

Customer Service: Yes, there is a 30-day return policy. You can return them for a full refund as long as they are in their original condition with all included accessories.
